

# IDA 2017

The Sixteenth International Symposium on  
Intelligent Data Analysis

London, UK

26 - 28 October, 2017

The IDA 2017 symposium seeks papers that go beyond established technology and offer genuinely novel and “game-changing” ideas.

## Call for Papers

IDA 2017 solicits papers on all aspects of modelling and intelligent data analysis, irrespective of discipline. This includes papers on novel techniques to modeling and analyzing data from complex, dynamical systems. In particular, it seeks papers that might be considered preliminary in other leading conferences but nevertheless contain potentially high impact research. The symposium will have two tracks: 1) the traditional *Proceedings Track*, with accepted papers published in the proceedings; and 2) the *Horizon Track*, which will allow authors to present their preliminary work without formally publishing it.

## PhD Posters & Videos

Like last years, PhD students will be given the opportunity to present and discuss their work at the symposium. More details will follow later on the IDA 2017 website and social media.

## Frontier Prize

The IDA Frontier Prize (1000 euros) will be awarded to the most visionary contribution.

## Key dates

19 May 2017 - Paper submission  
14 July 2017 - Author notification
